INTRODUCTION TO ATLAS PLASTICS

Atlas Plastics Pty Ltd is a Plastic Rotational Moulding, Extrusion and Thermoforming Manufacturing Company based in South Africa with our Head office and factory situated in Klerksdorp in the North West Province. Having started in 1969, we are one of the oldest rotational moulding companies in South Africa. With a national footprint to support our customers, we ensure excellent service and reliable delivery. Due to our focus on new product development, our product range continues to grow and covers numerous markets.

Sanitation was one of the first markets our company entered into where we produced the round toilet hut followed by various VIP pedestals. This market expanded after 1994 and so did the Atlas range of sanitary ware, into what is now a comprehensive range of products for the affordable housing market.

The majority of our moulds are made in-house by our skilled mouldmakers. This gives us the flexibility to adapt to our customer's needs and improve or redesign products whenever necessary. We have the added advantage of including our customers in the design process. This develops a strong partnership between us which ensures that the end product is exactly what our customers require.

We also offer the full Atlas Plastics range of fusion PP-R pipe and fittings from 20mm through to 125mm and Polypipe from 15mm to 28mm. This system has become increasingly popular within the South African market over the past few years.

Due to our innovative approach to the development of new products, we are now active in the following industries: Agricultural, Automotive, Building, Chemical, Construction, Hardware, Household, Mining, Municipal, Plumbing and Waste removal.

ABOUT US

The core ranges of products that we produce are:

- Portable Toilets
- Guard Huts
- Portable Showers
- Sanitation Systems
- Water Tanks and Drums
- Plastic Bins
- General Plastic Products
- PPR Pipes & Fittings
- Dragline Hoses
- Poly Pipe

We also manufacture a range of products which are custom-made for specific customers. These products are the culmination of research and development between our customers and ourselves to ensure the end product is exactly what they require.

Our research and development department uses state of the art computer equipment and applications to design, develop and test products. We are continually exploring and stretching the boundaries of plastic moulding while designing new and innovative products.

ULTRA HUT

The Ultra Hut is different from any other Portable Toilet on the South African market. This unit is locally manufactured with incredible quality and a unique design. The different components of the toilet are manufactured from HDPE as well as LLDPE, making it the best of both worlds. The aesthetically designed openings in the wall panels of the hut help improve ventilation, making the experience as pleasant as possible.

The Ultra Hut can be ordered as an assembled unit or as a flat-packed unit to be assembled on site. The flat-packed units have simple instructions included, together with all basic parts, to ensure a quick and complete assembly on site. Replacement parts are readily available.

The Ultra Hut has the following features:

- Flushable or non-flushable options
- Optional urinal and hand wash basin with a foot pump
- Solar Lights for evening events are available on request
- Coat hook
- Engaged lock
- Bench - or Tank options available (Drum sold separately)
- Translucent roof to provide sufficient lighting
- The unit is easy to clean, non-porous and is UV Stabilised
- Sliding indicator lock (Engaged / Vacant)
- Ventilation openings
- Vent pipe
- Double toilet roll holder
- Toilet is lockable from both inside and outside

Weight: 85kg
Dimensions: 1110mm x 1228mm x 2288mm

Tank Capacity: 235 litre

KING JOHN HUT

The King John Hut is a popular, upmarket unit with a roomy interior. This unit is used for high-end functions such as weddings and sporting events and can be used on construction sites and in other tough environments.

Weight: 78kg
Dimensions: 1045mm x 1228mm x 2288mm

Tank Capacity: 235 litre

The King John has the following features:

- Translucent roof to provide sufficient lighting
- The unit is easy to clean, non-porous and is UV Stabilised
- Sliding indicator lock (Engaged / Vacant)
- Hand wash basin with a foot-pump
- Ventilation openings
- Vent pipe
- Double toilet roll holder
- Toilet is lockable from both inside and outside
- Solar lights for evening events are available on request
- Non-slip flooring
- Flushable or non-flushable options
- Bench - or Tank options available (Drum sold separately)

KING JOHN LITE HUT

With less accessories but with the same exceptional quality, the King John Lite is an addition to the King John Hut. This hut is ideal for construction sites and other tough environments.

Weight: 78kg
Dimensions: 1045mm x 1228mm x 2288mm

Tank Capacity: 235 litre

The King John Lite has the following features:

- Translucent roof to provide sufficient lighting
- Sliding indicator lock (Engaged / Vacant)
- The unit is easy to clean, non-porous and is UV Stabilised
- Hand wash basin with a foot-pump
- Ventilation system for tank option
- Flushable or non-flushable options
- Bench or tank options available (Drum sold separately)
- Solar lights for evening events are available on request
- Double toilet roll holder
- Toilet is lockable from both inside and outside
- Non-slip flooring

FOREST HUT

Our Forest Hut is extensively used by toilet hire companies. This hut is ideally suited for teams on construction sites or remote facilities, contractors, informal settlements and for events.

The Forest Hut has the following features:

- Lockable door
- Light-weight for easy transportation
- Flushable or non-flushable options available
- Bench or tank options available
(Drum sold separately)

These additional accessories are available on request:

- Vent pipe
- Tie downs
- Handles
- Solar light

Weight: 85kg
Dimensions: 1249mm x 1106mm x 2222 mm

Tank Capacity: 210 liter

RIBBED HUT

Our Ribbed Hut which forms part of our Economy Hut range is designed for rural use and is most commonly used with a pit or pail pedestal or a chemical bench (Drum sold separately).

These additional accessories are available on request:

- Tie downs
- Handles

Weight: 58kg
Dimensions: 1022mm x 1060mm x 1975mm

ROUND HUT

Our Round Hut which forms part of our Economy Hut range is designed for rural use and is most commonly used with a P-trap pan, pit or pail pedestal or a chemical bench.

Weight: 37kg
Dimensions: 1100mm x 2100mm

These additional accessories are available on request:

- Tie downs
- Handles

GUARD HUT

Our Round Guard Hut forms part of our Specialized Hut range. This hut is made from the highest quality LLDPE material, to provide years of dependable service. It is low maintenance, portable, durable and can be used on construction sites, at factories and warehouses, public places and events.

Weight: 36.8kg
Dimensions: 1100mm x 2080mm

The benefits of this hut is protection against the elements, improvement of working conditions and can be used as a deterrent.

Colours available: Blue / Black / Orange

SHOWER HUT

Our Shower Hut forms part of our Specialized Hut range. This hut is very durable and is used by security, construction and toilet hire companies.

The Shower Hut is fitted with a floor and a drain and it works very well on temporary facilities. This shower only works with cold water.

Weight: 100kg
Dimensions: 1220mm x 1550mm x 2000mm

DIGESTER / SEPTIC TANK

Our Digester / Septic Tank is designed for the disposal of sewerage only. A septic tank brings about the digestion of organic matter and black water can be discharged into a soak-away in the ground over time.

Available capacities: 1000 Lt, 1250 Lt, 1550 Lt, 1750 Lt, 2000 Lt, 2500 Lt

PRODUCT CODES:	DIMENSIONS:	WEIGHTS:	PEOPLE:	TANK SIZE:
1000 litre Digester	1250 x 1060 mm	37.0 kg	1 to 2	1000lt
1250 litre Digester	1250 x 1270 mm	42.0 kg	2 to 4	1250lt
1550 litre Digester	1250 x 1485 mm	47.0 kg	2 to 5	1550lt

2500 litre Digester	1250 x 2325 mm	72.0 kg	4 to 10	2500lt

300MM MANHOLE EXTENSION

300mm Manhole extensions are used on digesters when installed underground. An extension is used to get the manhole cover level with the ground. If the tank is 300mm underground, 1 extension is used. If the tank is 600mm underground, 2 extensions are used.

Weight: 1kg
Dimensions: 410mm x 355mm x 345mm

HUT ACCESSORIES & WASTE DRUMS

KING JOHN HAND WASH BASIN 45LT

Our King John Hand Wash Basin is reliable, hygienic and easy to use. It comes standard with a foot pump for hands-free operation. Adds comfort to all outdoor events where no water connections are available.

Dimensions: 390mm × 277mm × 890mm

ULTRA BASIN 60LT

Our Ultra Basin is reliable, hygienic and easy to use: It comes standard with a footpump for hands-free operation. Adds comfort to all outdoor events where no water connections are available.

Dimensions: 465mm × 200mm × 1020mm

ULTRA URINAL

Our Ultra Urinal is easy to install in any of our mobile toilet huts.

WASTE DRUM

These 125 litre multipurpose drums are used in the sanitation market and are primarily used in chemical toilets for easy removal and transport. These drums are fitted with lids and clamps.

WASTE DRUM WITH HANDLES

These drums are fitted with lids and clamps.

VIKING CLOSE COUPLED TOILET

Our Viking™ Close Coupled Toilet (patent no. P2015/06505) has set new industry standards with its all-in-one design and follows on the success of the Viking™ Basin, Urinal and Pan, providing exceptional finishes and attention to detail. Aimed at reducing manufacturing costs, labour costs, alleviating problems associated with leakage between the cistern and collecting bowl, this innovative toilet overcomes problems traditionally associated with installation of toilets.

Dimensions: 416 × 690 × 768 mm

GEMINI P-TRAP PAN

Our durable, low-level P-Trap Pan is suitable for both home and public ablution applications. Installation is simple with an available option of rawl bolting the pan to the floor.

Dimensions: 475mm x 395mm x 372mm

THRU PAN WITH FLAP

Our Thru Pan Pedestal has been designed to be incorporated into a sanitation system. The unit will flush directly into a digester. Used in rural areas where water and sewage facilities are not available.

Dimensions: 360mm x 460mm x 394mm

VIKING TOILET PAN

Our Viking™ Toilet Pan is specifically designed to be used with a concealed cistern. This reduces the possibility of vandalism and makes it perfect for areas like public ablutions, schools, correction facilities and hospitals. This pan can also be used for paraplegic facilities. This WC pan has a moulded-in seat which keeps a professional finish but eliminates the costs to replace the seat and flap due to general wear and tear.

Dimensions: 510mm x 435mm x 414mm

VIP 100 PEDESTAL

Our VIP 100 Pedestal comes with a 100mm outlet and is ideally suitable for septic tank systems or can be used over a pit. Our pedestals were designed to be used in rural settlements and public facilities where there is no sewage system.

Dimensions: 364mm x 475mm x 480mm

VIP 200 PEDESTAL

Our VIP 200 Pedestal with a 200mm outlet incorporates a comfortable seat that is not only hygienic but low cost. Our pedestals were designed to be used in rural settlements and public facilities where there is no sewage system.

Dimensions: 387mm x 466mm x 518mm

BAMBI LONG DROP

Our Bambi Long Drop Pedestal for children is designed to be used in rural settlements and public facilities where there is no sewage system.

Dimensions: 270mm x 360mm x 400mm

BAMBI PAN

Our Bambi Pan is a durable, low flushing toilet specifically designed for children. The Bambi Pan can be connected to a remote cistern. This item can be used in schools, low-cost housing and public facilities.

Dimensions: 282mm x 360mm x 300mm

CISTERN

Strong and durable 6 litre and 9 litre cisterns that have a release system to aid in the use of less water for flushing. Top Pull Flush internals are included and installed as a standard unless otherwise specified. Atlas cisterns are used with our Pans in schools, low-cost housing and other public facilities.

Dimensions: 178mm x 432mm x 273mm (6 litre)
Dimensions: 178mm x 432mm x 368mm (9 litre)

RURAL SEAT FUNNEL

Our Rural Seat Funnel is designed for pit type toilets in rural environments.

Dimensions: 420mm x 488mm x 430mm

PIT PEDESTAL

The original Atlas Pit Pedestal with a newly designed incorporated seat. Perfectly suited for the rural environment where there is no sewage system.

Dimensions: 482mm x 650mm x 505mm

SEAT AND FLAP

This is optional to purchase with all of our pans.

Dimensions: 458mm x 375mm

TOILETS

VIP 200 INLET FUNNEL

An accessory to the VIP200 which can be used in a concrete slab to assist with the installation of the pedestal.

Dimensions: 107mm x 248mm x 488mm

BASINS

CHRISTY BASIN

Hand wash basins that are easy to install and will last in tough environments. The Christy Basin is made with a moulded-in soap holder and will fit a standard 40mm waste. Steel brackets are assembled onto the basin to simplify installation. Our basins are used in container toilets, at schools, stations, hostels, correctional facilities and more.

Dimensions: 570mm x 400mm x 245mm

CINDY BASIN

A small hand wash basin that is easy to install and will fit in a bathroom with limited space. The Cindy Basin has a moulded-in waste and is ideally used in container toilets, on construction sites and at schools.

Dimensions: 400mm x 360mm x 240mm

VIKING HAND BASIN

Our Viking™ hand wash basin has a low theft factor, no resell value and reduced possibility of vandalism. Easy installation and low maintenance make it perfect for schools, hospitals, correctional facilities and other tough environments.

Dimensions: 510mm x 380mm x 250mm

BASINS

VIKING DOUBLE BASIN

Our Viking™ Double hand wash basin will cut your installation time in half. Ideally designed to be used in container projects, schools, correctional facilities and other public facilities. The Double Basin has moulded-in soap holders and will fit a standard 40mm waste.

Dimensions: 414mm x 1000mm x 257mm

URINALS

3 MAN URINAL

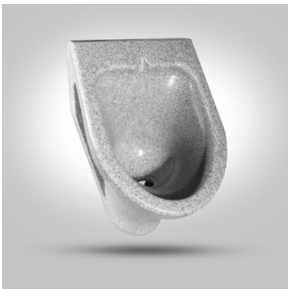

The perfect addition to portable restrooms and for any event with high foot traffic. Reduces long queues for restrooms. From funerals to stadiums, sporting events and social functions, we can help make your next event a great success. With its clean and elegant design, this unit offers more privacy. Splits in half for easy transportation.

Height: 1750mm

Width: 1250mm

Depth: 1100mm

Waste capacity: 290 litre

VIKING URINAL

Our Viking™ Urinal is the perfect solution for public ablutions where a strong and tough urinal is required. Also available with our waterless waste fitting as an optional extra. Concealed trap used with flush-master.

Dimensions: 320mm x 363mm x 553mm

URINALS

BOWL URINAL

A durable and tough urinal that can be connected to a water supply. Our Bowl Urinals can be used in mobile ablutions, stations, hospitals and other public facilities.

Dimensions: 320mm x 350mm x 495mm

SC URINAL

The SC Urinal is a perfect solution for public ablutions where a strong and tough urinal is required. The urinal has a semi-concealed trap. The urinal is ideally used in mobile ablutions, stations, hospitals and other public facilities. Can be connected to the water supply. Also available with our waterless urinal fitting.

Dimensions: 320mm x 350mm x 470mm

WATERLESS URINAL WASTE

The Waterless Urinal Waste can be used with most of our urinals where there is no running water available to connect to the urinal. Improves hygiene in bathrooms. They can be used with our 511AP, 508AP and 509AP urinals.

Dimensions: 50mm x 75mm

BATH

SIT BATH

Our Sit Bath is a combination of a shower base and a bath, ideal for space-saving in a small bathroom. Ideal for low-cost housing projects, campsites and nursing homes.

Dimensions: 700mm x 1000mm x 376mm

WASH TROUGHS

Our Wash Troughs are the ideal outdoor wash troughs for all those messy items that you do not want to clean inside your home. Our Wash Troughs can be used in low cost housing, camp sites, hostels, hospitals and more.

Product:	Dimensions:
30 litre Wash Trough Only	396 x 496 x 328 mm
30 litre Wash Trough with Galvanised Strip	412 x 528 x 274 mm
30 litre Wash Trough with Galvanised Bracket	412 x 528 x 275 mm

WASH TROUGH – 45 LITRE

45 litre Wash Trough with Galvanised Bracket

Dimensions: 660 x 490 x 260 mm

WASH TROUGH – 60 LITRE

60 litre Wash Trough with Galvanised Bracket

Dimensions: 490 x 600 x 363 mm

WASH TROUGH – 65 LITRE

65 litre Wash Trough with Galvanised Bracket

Dimensions: 490 x 600 x 363 mm

65 litre Wash Trough Splash Back

Dimensions: 496 x 750 x 410 mm

SINK

SINK – 800MM

High-quality sink, perfect for low-cost housing projects and campsites. It bolts directly onto the wall without the need for a bracket and has a moulded-in waste. Available in left and right-hand options.

Dimensions: 787mm x 455mm x 210mm

ATLAS TANK

Our range of Atlas Water Tanks are ideal for harvesting one of our most precious resources – water; saving you money and saving our environment. Depending on your needs, multiple tanks can be joined together to increase your water-saving capacity.

The tanks are easily maintained and manufactured from food-grade LLDPE to ensure safe human consumption. All our tanks have UV Stabilised material which prevents the growth of algae.

Available capacities: 5000Lt, 4200Lt, 2500Lt, 1000Lt

RAIN HARVESTING TANK - 1500 LITRE

Our Rain Harvesting Tank is perfectly suited for any home use. Our compact and aesthetically designed tank will fit comfortably into most urban properties. Depending on your needs, multiple tanks can be joined to increase your water saving capacity.

- A perfect solution for Estates where tank visibility is an issue
- Our tank is designed to sit below the window, out of site
- It holds sufficient water for a household of 4 people for up to 4 days
- No Municipal approval is needed for our 1500 litre tank

Dimensions: 1040mm x 1850mm x 968mm

RAINSAVER TANK - 700 LITRE

Our Rainsaver Tank is ideal for harvesting one of our most precious resources – water, saving you money and our environment.

Our Rainsaver Tank is perfectly suited for home use – being both compact and aesthetically designed, it will fit comfortably into most urban properties. Depending on your needs, multiple tanks can be joined together to increase your water-saving capacity.

Dimensions: 725mm x 1885mm

BAKKIE TANK - 500 LITRE

Our Bakkie Tank is ideal for the storage and transport of fluids. Designed to fit on the back of single cab bakkies.

Dimensions: 883mm x 1360mm x 535mm

HORIZONTAL WATER TANK

Our Horizontal Water Tank is manufactured from food-grade composites to ensure that freshwater stored is safe for human consumption. UV Stabilised material prevents the growth of algae. It simplifies transportation of water.

Available capacities: 250Lt, 500Lt

250Lt Dimensions: 600mm x 1200mm x 500mm
500Lt Dimensions: 800mm x 1240mm x 840mm

METRO WATER TANK - 180 LITRE

Our Metro Tank is used as a low-pressure reservoir in households. The tank is placed either on the roof or inside the house. The tank has a volume of 180 litres.

The tank is manufactured as a double layer, with a black polyethylene inner layer and a white compound UV outer layer. The black inner layer is used to stop sunlight from entering the tank which helps prevent the build-up of algae.

Dimensions: 630mm x 800mm x 515mm

DRUMS

CHEMICAL DRUM

Our Chemical Drums are commonly used for transporting and storing various chemicals and liquids. These plastic drums are the perfect way to ship or store your liquids in a safe, reliable and corrosion-free container.

Available capacities: 50Lt, 100Lt, 210Lt

50Lt Dimensions: 388mm x 555mm
100Lt Dimensions: 460mm x 710mm
210Lt Dimensions: 570mm x 934mm

OPENHEAD DRUM

Our Openhead Drum is a versatile storage drum for various uses. The drum securely seals with a lid and lockable clamp.

Openhead Drums can be left open-topped (with no lid) or sealed with secure lids and fastenings for transportation or storage purposes.

Available capacities: 50Lt, 100Lt, 210Lt

50Lt Dimensions: 370mm x 626mm
100Lt Dimensions: 480mm x 740mm
210Lt Dimensions: 600mm x 990mm

OVAL DRUM – 50 LITRE

Our Oval Drums are commonly used for transporting and storing various chemicals and liquids. These plastic drums are the perfect way to ship or store your liquids in a safe, reliable and corrosion-free container.

Our Oval drums are made from food grade LLDPE material and it securely seals with 2 bungs and O-rings.

Dimensions: 478mm x 580mm x 325mm

BUCKETS

PAIL – 20 LITRE

Our tough and durable 20 litre Pail comes with a galvanised handle. Ideally used in the sanitation industry where there is no access to sewage systems. Also available without a handle for a reduced price.

Dimensions: 375mm x 258mm x 350mm

ROUND BUILDERS BUCKET - 12 LITRE

Our tough and durable Round Builders Buckets are essential for general use and construction projects.

Dimensions: 314mm x 258mm

TRIANGULAR BUILDERS BUCKET - 15 LITRE

Our tough and durable Triangular Builders Buckets are essential for general use and construction projects.

Dimensions: 350mm x 344mm x 270mm

MILK BUCKET - 4.5 LITRE

Our Atlas 4.5 Litre Milk Bucket with a galvanised handle is a tough bucket, ideal for use on construction sites.

Dimensions: 230mm x 216mm x 158mm

DUSTBINS

BATHROOM WASTE BIN

Our Bathroom Waste Bin is small and durable, suitable for bathrooms in any environment. Can also be used as a SHE bin.

Dimensions: 384mm x 228mm x 568mm

DUSTBIN & LID – 85 LITRE

Our 85 Litre Dustbins are all manufactured from durable & weather resistant plastic materials. Waste disposal is quickly and easily accomplished with this dustbin. These durable dustbins are an essential addition to any household or business.

Whether you need to dispose of household or commercial waste, an 85 litre dustbin is a practical choice. Available in various colours.

Dimensions: 513mm x 735mm

PEW STREET BIN

An outdoor bin for use by municipalities. Available in a range of colours to suit the environment. A lid is available as an option.

Dimensions: 590mm x 795mm

RECYCLING BIN

Our Outdoor Recycling Bin with a configuration of 3 dividers linked together for stability and finished off with a single lid and base. Available in various standard colours depending on your requirements.

- Rust Free
- Low Theft Factor
- Strong and Robust

Dimensions: 725mm x 1290mm

BIN ON WHEELS - 240 LITRE

Tough bins, made from the highest quality LLDPE to provide years of dependable service.

Baboon lid available on request: The lid is specially designed to prevent baboons and monkeys from removing the litter.

Dimensions: 1110mm x 623mm x 800mm

POLE BINS

RECTANGULAR POLE BIN – 25 LITRE

Our 25 Litre Rectangular Pole Bin is part of a range of bins to suit every outdoor application. Available with or without the swing bracket.

Dimensions: 460mm x 322mm x 680mm

RECTANGULAR POLE BIN – 50 LITRE

Our 50 Litre Rectangular Pole Bin is part of a range of bins to suit every outdoor application. Available with or without the swing bracket.

Dimensions: 460mm x 327mm x 680mm

CCC POLE BIN – 80 LITRE

Our CCC Pole Bin is a trusted municipal street pole bin. A stylish bin with inner for easy cleaning.

Dimensions: 448mm x 338mm x 938mm

CCC BABOON PROOF POLE BIN

Our CCC Baboon Proof Pole Bin has been a trusted municipal street pole bin, the CCC baboon lid is specifically designed to prevent baboons and monkeys from removing the litter from the bin.

Dimensions: 448mm x 338mm x 938mm

DSW STREET BIN

An outdoor bin for use by municipalities. Available in a range of colours to suit the environment. A lid is available on request.

Dimensions: 600mm x 590mm x 785mm

ROUND POLE BIN – 50 LITRE

Our 50 Litre Round Pole Bin is part of a range of bins to suit every outdoor application. Available with or without the swing bracket.

Dimensions: 490mm x 490mm

LOCKER

Our Atlas Locker is durable, rust-free and lockable, making it the ultimate storage solution for any industry.

Extras available: mirror, coat hook, linking pin and a plastic tray.

Dimensions: 830mm x 308mm x 426mm

STORAGE BIN

Our Atlas Storage Bin is a simple, smart and convenient way to store and organize materials in warehouses, factories and all types of industrial facilities. Comes with a lid that keeps your items secure from dust and debris. The special strength of this material makes these bins long lasting, sturdy and ideal for transporting equipment that requires protection.

Dimensions: 765mm x 515mm x 468mm

TOOLBOXES

HIPPO TOOLBOX

Keep your tools safe, portable and organized with our durable mobile Hippo Toolbox. The Hippo Toolbox was designed with a sturdy handle and two smooth rolling wheels which makes it easy to transport all your tools to any job site. It can also be locked for added security, ensuring your tools are always safe.

Dimensions: 755mm x 305mm x 295mm

Removable divider available as an add-on.

RHINO TOOLBOX

The Rhino toolbox with tray is a compact unit which allows organizing of tools and spares with ease. This stackable, rugged toolbox can be used to transport almost any piece of equipment. The moulded-in indent on the lid permits cutting pipe with ease.

Dimensions: 540mm x 290mm x 270mm

SAFE STEP

Great step up for the kitchen, bathroom, closets, storage shelves and all those hard-to-reach areas. Sturdy enough to support adults and safe for kids.

Dimensions: 478mm x 478mm x 353mm

DOG KENNEL

Small and Large Dog Kennels with detachable flooring for easy cleaning. Non-absorbant (Will not harbour tics & flees). Quick drying when cleaned.

Small Kennel Dimensions: 610mm x 525mm x 760mm
Large Kennel Dimensions: 750mm x 800mm x 875mm

COLLAPSABLE DOG KENNEL

Collapsable Dog Kennel, non-absorbant (Will not harbour tics & flees). Quick drying when cleaned.

Dimensions: 720mm x 937mm x 698mm

VEHICLE STOP

Simple but important safety product placed in front or behind the wheels of trailers and other vehicles to prevent it from unintentionally moving.

Dimensions: 190mm x 360mm x 220mm

POLY PIPE AND FITTINGS

Complies with the SANS 15874 specification, ensuring the best quality pipe to transport most liquids.

- Poly pipe is available in 15mm, 22mm and 28mm, in straight lengths of 6m and coils of 25m, 50m and 100m.
- Atlas Poly pipe is designed to work between 0°C and 75°C.

The pipe should not be used on an uncontrolled heat source. Should brass compression fittings be used on our pipe, suitable inserts must be used on these joints.

Available colours: Brown, Beige & White.

POLY PIPE

POLY PIPE
Available in
15mm - 28mm

DRAGLINE HOSE

The Dragline Pressure Hose is designed in two layers with polyester reinforcing over the inner layer. There is longitudinal reinforcing in polyester to limit stretching over distances.

The outer layer is fluted to withstand vigorous farming conditions, making it hard-wearing and thereby increasing its lifespan. It is cut- and abrasion-resistant, UV resistant and able to withstand temperatures from 0° C to 60°C. The hose is marked with the company name and manufacturing date.

TECHNICAL DATA	NOMINAL ID	
	20mm	25mm
Description		
Internal Diameter	20mm	25mm
Outer Diameter (Nominal)	25mm	31mm
Burst Pressure	6000kpa	5600kpa
Work Pressure	1500kpa	1400kpa
Mass per meter (Nominal)	0.33kg	0.4kg

METRIC PIPE AND FITTING

FUSION METRIC PIPE

Available in 20mm to 125mm

METRIC FUSION FITTINGS

SIZES: 20mm & 125mm

	Elbow 90°		Equal Tee		Socket
	Elbow 45°		End Cap		Male Plug
	Fusion Union		Reducing Bush		Reducing Tee
	Crossover		Omega		Saddle
	Valve		Flange Adaptor		Holder Bat

PPR RANGE 20mm & 125mm

	Straight Male Insert		Straight Female Insert		Elbow 90° Male Insert
	Elbow 90° Female Insert		Wall Plate Elbow Male Insert		Wall Plate Elbow Female Insert

TOOLS

Fusion Machine

Welding Sockets
